

Morbark Wood Hog

Product Information

Model 3600

The Model 3600 Wood Hog completes the Morbark horizontal grinder line-up, giving contractors, municipalities and waste processors another important option in wood recycling equipment. With four new Morbark designs - the massive 7600, the mid sized 5600, 4600 and now the 3600 - customers can select a heavy duty, industrial Morbark wood hog precisely matched to the volume reductions needs of their specific operation and budget.

With power options ranging from 250 HP up to 500 HP along with Morbark's customary heavy duty construction, the Model 3600 has the muscle and size to process a wide variety of wood waste while maintaining ease of portability and relatively low capital investment.

The 3600 centers around a heavy duty Morbark 65 cm diameter by 145 cm wide hammermill rotor with 36 T-1 steel holders. Equipped with fixed or swing hammers with double-edged replaceable cutting inserts or hard metal bits. Material is fed to the rotor from an 5 m³ hopper with a live chain bed assisted by a horizontal feed wheel with a diameter of 74 cm and a wide of 160 cm. Material is discharged with a 122 cm wide belly / stacking conveyor belt which has a stacking height of 3,95 m.

Standard equipment includes electronic RPM sensor, emergency shut down system, remote control, full break-away torque limiter and a tandem-axle pintle hitch chassis conform the European Road Regulations.
